

COMPANY OVERVIEW

CertifySpace

A UK marketplace for property services.

CertifySpace brings property owners and occupiers together with property-service firms, from energy assessors and electricians to surveyors, architects, structural engineers and conveyancers.

IN ONE SENTENCE

CertifySpace helps people request property services, compare anonymous quotes and arrange bookings with verified professionals.

Who it is for

Homeowners, buyers, sellers, landlords, tenants and property agents. Firms have a separate trade workspace for services, enquiries, quotes, bookings and their team.

How the marketplace works

01 Request a service

Customers describe the property and the work needed using service-specific forms.

02 Compare quotes

Quotes show the services covered and their prices. Firm identities stay anonymous before booking acceptance.

03 Book and manage

On acceptance, the firm and customer can see the contact details needed to deliver the job.

For journalists

Background for coverage of property services, compliance and digital marketplaces.

What makes it different

Service-specific verification

Accreditation and insurance are checked for the services a firm offers. Expired evidence can pause the affected service.

Anonymous comparison

Customers can compare quotes before a booking reveals the firm. Contact-purchase routes are also available to firms where enabled.

Multi-service requests

When a firm offers more than one requested service, these can be grouped. Other services are handled individually; one firm is not guaranteed for an entire pack.

Property records

Owners can keep property documents, tenancy information and service records together, with controlled sharing of certificates.

Brand essentials

Name: CertifySpace, one word, capital C and S.
